GOING THROUGH THE "CHANGE": ARE YOU READY?

In the U.S., over 45 million women are in the process of going through menopause at the current time. A common feature of menopause is the gradual but undesirable reduction of the hormone, estradiol. During this biological process, many women may experience a range of uncomfortable issues including hot flashes and night sweats.

Vasomotor symptoms such as hot flashes or night sweats are common during menopause and may affect over 80% of women. Recent studies show that the average duration of these vasomotor symptoms is around 7.4 years. About 10% of women will have symptoms that last for as long as 12 years. For some, symptoms may persist even longer. Although menopause concerns may affect women to various degrees, they sometimes cause discomfort and distress.

In addition, one in four women experiences a loss of sexual desire which can affect women going through menopause as well as adult women of all ages. Few natural supplement options have been available to effectively address these female concerns.

DISCOVER THE POWER OF PREMIER QUALITY

Discover the power of premier quality nutrients for women's health. The key to a happy, healthy life rests squarely on your nutritional foundation so that your body, mind and soul can function at their best. The wise choice is to keep your nutritional status at its peak every day with premier quality nutrition.

We invite you to experience the power of premier quality nutrition so the "Premier Quality Effect" can work for you!

LIBIFEM: HEALTHY MENOPAUSE SUPPORT

Radiant Woman was formulated to feature two unique botanical extracts that offer exceptionally excellent support for women’s health, vitality and sexual desire. The first ingredient is a proprietary, patent-pending standardized fenugreek extract called Libifem® which has been clinically studied for its benefits to promote healthy menopause comfort and also healthy sexual desire.

Libifem® is made from fenugreek seeds which naturally contain over 100 phytochemical constituents, including steroidal saponins and furostanol saponins. In fact, fenugreek seeds have been used for centuries to support female health, including sexual desire.

Libifem® fenugreek extract has been clinically shown to help alleviate normal symptoms of menopause, including the reduction of hot flashes and night sweats. This extract also been clinically shown to promote healthy female sexual vitality and sexual desire. Thus, this herbal extract helps promote a healthy quality of life during menopause.

One clinical study was conducted to assess the effectiveness of Libifem® fenugreek extract on normal symptoms of menopause in healthy women. This 12-week, double-blind, randomized, placebo-controlled clinical trial was conducted with healthy women (between the ages of 40 to 65 years) who were experiencing common symptoms of menopause, such as hot flashes and night sweats. The results showed reductions in menopausal symptoms in all sub-domains (vasomotor, psychosocial, physical and sexual).

A second clinical trial (placebo-controlled, randomized, double blind) studied 80 healthy women of menstruating age (ages 20 to 49 years) for 8 weeks who were in stable relationships. The results of the study showed the effectiveness of Libifem in supporting healthy female sexual desire and experience.

TONKAT ALI: THE ULTIMATE ADAPTOGEN

In addition, the formula of Radiant Woman features a second powerful, clinically studied ingredient, LJ100. On the list of sexual vitality ingredients, one ingredient stands out from all the rest: Tongkat Ali. Tongkat Ali has been called Malaysian ginseng and is extensively consumed for its sexual support qualities.

LJ100® is made from wild-crafted Tongkat Ali root, also called Longjack (botanical name: *Eurycoma longifolia*) which is sourced from the rainforests of Malaysia by using sustainable harvesting and fair-trade practices. LJ100® is produced using a patented extraction technology which is standardized to 1% eurycomanone. LJ100 is produced by using only water as the extraction method. This method is preferred because previous tests using other solvents for extraction produced unwanted secondary compounds that were toxic.

Thus LJ100 is sought after for its ability to support sexual vitality and desire in both women and men. Some believe that Tongkat Ali is the ultimate adaptogen.

INGREDIENTS

Three Vegetarian Capsules Provide:
