She began to access and navigate her etheric body and the connection between emotional and ancestral memory. One evening Geraldine experienced a fully conscious interdimensional contact experience. This experience resulted in the activation of the psychic abilities. In 2017, Geraldine began to receive Downloads of information regarding the structure of the Universe, Universal laws and the nature of DNA in human Biology as it pertained to the soul.

Working Closely with the cultivation of life force and diving deep into humana Biology and the morphogenetic field she created a healing modality called DNA reprogramming, a combination of epigenetic psychotherapy and a thorough understanding of the life force runways through the body in order to identify, transmute and heal the body and soul written within DNA.
